

# **Star-Kist Cannery Facility Project**

FINAL MITIGATION MONITORING AND REPORTING PROGRAM

Prepared by:

Environmental Management Division

Los Angeles Harbor Department

425 South Palos Verdes Street

San Pedro, California 90731

<b>Mitigation Measure, Lease Measure or Standard Condition of Approval</b>	<b>Timing and Methods</b>	<b>Responsible Parties</b>
<p><b>MM-BIO-1:</b> To minimize the effect of nighttime lighting on wildlife species, exterior lighting around the perimeter of the Project site will be designed to avoid light intrusion and spillage into surrounding areas, particularly Fish Harbor, through the use of shielding, height minimization (i.e., low to ground), and directional placement (i.e., downward facing lights). Exterior lighting will also use bulbs that are of a spectrum, wavelength, and intensity that minimize disruption to wildlife. Prior to issuance of construction permits, exterior lighting plans and specifications will be identified in construction site plans and will be provided to LAHD for review and approval.</p>	<p><b>Timing:</b> Throughout project design and during construction and operation.</p> <p><b>Methods:</b> LAHD shall include this measure in the contract specifications for construction. LAHD shall monitor implementation of mitigation measures during construction</p>	<p><b>Implementation:</b> LAHD through Construction Contractor</p> <p><b>Monitoring and Reporting:</b> EMD and Construction Management Division</p>
