Email dated April 21, 2016 From Matt Mayer (Hertz) to Jessica Dalton (NC State Purchasing Department)

On Thu, Apr 21, 2016 at 7:01 PM, Matthew V. Mayer <MMayer@hertz.com> wrote:
Jessica,

At this time, Hertz Equipment Rental (HERC) would like to request for your review and approval rate changes to ten items in our contract for economic reasons. We realize we have a contract with North Carolina State University where we have agreed to locked rates for three years, however variables outside our control has lead us to make this sensitive request.

The principle reason for this request is HERC has realized large increases in investment costs on some of our equipment offerings. These increases have been driven by the required upgrades in engine technology to meet Federal emission standards. Although all units that we currently own haven't been largely impacted, the units we have purchased in the most years have been greatly affected. With that said, logic would suggest that we apply new, increased rates to only rentals being filled with newer equipment. However, rentals are not filled in that manner, rather they are filled with the unit(s) we currently have sitting, regardless of whether it's a new or older unit.

Below is a quick summary of the percent increase per equipment type we are requesting for your review. Attached is the detail of the increases by equipment type and price offering – Platinum, Gold, and Preferred. The rate increases being requested are equal to the percent increase in the average cost of the fleet from when the contract was bid, November 2013, to now. This is not the difference in the cost of these types of equipment today versus those purchased in prior years, for that difference would be too large an increase to request and would not be representative of the fleet mix by the different years they are purchased.
