**RENEWABLE DIESEL REQUIREMENT
(ATTACHMENT – A)**

(f) Renewable Diesel Requirements

- (1) Beginning January 1, 2024, all fleets subject to this regulation are required to procure R99 or R100 renewable diesel and use this fuel in all vehicles subject to this regulation, including rental equipment, when operating them in California, subject to the exemptions provided in section 2449.1(f)(2) below.
- (2) The following are exempt from the renewable diesel requirements in section 2449.1(f)(1):
 - (A) Any fleet or fleet portion that is designated as a captive attainment area fleet, as described in section 2449(c)(6); or any vehicle while it is operating in one of the counties listed under the definition of a captive attainment area fleet in section 2449(c)(6);
 - (B) Any fleet or fleet portion that is comprised entirely of vehicles with Tier 4 final engines, model year 2010 or newer on-road engines, or zero-emission vehicles;

(C) Any fleet, fleet portion, or vehicle that is located or operated in a location where the 10th percentile minimum ambient air low temperature in January drops below 20 degrees Fahrenheit (20° F) is exempt from the renewable diesel requirements in section 2449.1(f)(1) solely for the months of November, December, January, and February. These fleets or vehicles may use a low temperature-specific diesel fuel while that fleet or vehicle is located or operating in that location. Fleets utilizing this exemption may procure low-temperature-specific diesel fuel from October 15 through the end of February and may continue to use excess low-temperature-specific diesel procured during this time period. Fleets may not continue to procure low temperature-specific diesel fuel after the end of February through October 14. All fleets utilizing this exemption must report to CARB in accordance with section 2449(g)(5)(A); and

(D) Any fleet, fleet portion, or vehicle that is located or operated in a location where the temperature drops below 20° F or a commercial or government-provided local weather forecast predicts temperatures to drop below 20° F may use and procure low temperature-specific diesel fuel for the period of days in which the low-temperature condition(s) occurs. The temperature forecast must occur within 14 days from the first day in which the low-temperature condition(s) occurs. After the low-temperature condition(s) end, the fleet may use the remaining excess low temperature-specific diesel in the vehicle until the next refueling of the vehicle. All fleets utilizing this exemption must report to CARB in accordance with section 2449(g)(5)(B).

(3) If a portion of a fleet is unable to procure R99 or R100 renewable diesel through its normal refueling methods, where a fleet's preference for a specific distributor or a specific brand is not considered a necessary component of its normal refueling method, those vehicles for which R99 or R100 renewable diesel could not be procured are not required to comply with Section 2449.1(f)(1) if the fleet maintains documentation, in accordance with the record keeping requirements described in section 2449(h), that includes:

(A) A description of the fleet's normal refueling methods, taking into account factors such as the location of the job site, storage site, and retail station refueling;

- (B) A description of the fleet's attempts to obtain R99 or R100 renewable diesel and continued attempts to obtain R99 or R100 renewable diesel, at a minimum, on a quarterly basis or when vehicles move to a new job site; and
- (C) Documentation showing the inability to procure R99 or R100 renewable diesel, such as communications from fuel providers, contract bids, or maps of refueling stations near a job site.
- (4) Fleets that provide for rent vehicles subject to this regulation to other entities must include language in their rental contract that the recipient of the rented vehicle (renter) must comply with the renewable diesel requirements in section 2449.1(f). Rental fleets that include such language in their rental contracts will not be held liable if a rented vehicle under their ownership is not compliant with section 2449.1(f). If CARB requests information from a rental fleet to verify compliance with the renewable diesel requirements in section 2449.1(f), then the rental fleet must disclose the relevant renter's company name and business contact information to CARB within 5 days of CARB's request.

Coverage for claims under U.S. Longshore and Harbor Workers' Compensation Act, if required under applicable law, shall be included. Such Worker's Compensation and occupational disease requirements shall include coverage for all employees of Vendor, and for all employees of any subcontractor or other vendor retained by Vendor.

Non-owned disposal site coverage shall also be provided if Vendor is handling, storing or generating hazardous materials or any material/substance otherwise regulated under governmental laws/regulations.

The insurance provided shall contain a severability of interest clause and shall provide that any other insurance maintained by the Harbor Department shall be excess of Vendor's insurance and shall not contribute with it.
