Summary Beautifying and maintaining the Vic & Bonnie Christensen Science Center (San Pedro) and improving public access to the Port of Los Angeles at Terminal Island (Wilmington)

DELIVERABLES

Goal # 1

Clean, beautify and remove debris from the Terminal Island main roadway and access roads leading to the Japanese Memorial and Federal Corrections Facility, located in Wilmington.

Goal # 2

Engage the local community to assist in the beautifying and debris removal at their Los Angeles Port and surrounding vicinities.

Goal # 3

Beautify and maintain the biological habitat and surrounding grounds, including native trees for carbon sequestration at a San Pedro community resource located at the Vic & Bonnie Christensen Math, Technology & Science Center, over the course of one-year.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port’s **aesthetic, biological habitat and community resources** impact on the communities of Wilmington and/or San Pedro by **beautifying and maintaining port land and community resources in San Pedro and Wilmington**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **through 1) improvement of the visual and aesthetic quality of a specific area, on Terminal Island and in San Pedro, 2) improvement of public access to the Port of Los Angeles, and 3) maintenance of carbon reducing trees and plant life that capture air pollutants**; and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

	Reporting Period Ends	Report Due
Six-Month Progress Report	3/31/2015	4/30/2015
Final Report	9/30/2015	10/30/2015

All reporting forms will be made available to the grantee through the Submittable online system.

HCBF Site Visits & Grantee Meetings. HCBF Staff will periodically contact grantees to conduct site visits or attend grantee meetings. The purpose of the site visit is to help HCBF better understand the nature of your project or program and offer assistance, as needed. Grantee meetings facilitate collaboration, communicate work, and share best practices.

Disbursement Schedule

Installment 1 (payable within 30 days of full execution)	2*	Total
\$15,000	\$15,000	\$30,000

*Second disbursement contingent upon receipt, review, and approval of Six-Month Progress Report

Accepted on behalf of:

Summary Sailing equipment and scholarships for underserved youth

DELIVERABLES

Goal # 1

Extend scholarships to at-risk youth in Wilmington and San Pedro to develop water and sailing skills.

Goal # 2

Purchase marine equipment (boats) to develop youth sailing skills

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **recreation and community resources** impact on the communities of Wilmington and/or San Pedro by **providing sailing scholarships to at-risk youth in San Pedro and Wilmington**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment through **1) increased recreational access to, and use of, the Los Angeles Harbor, and 2) providing access to a community resource unique to the Harbor**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

	Reporting Period Ends	Report Due

Summary Cleanup and maintenance of streets, alleys and landscaped areas in areas immediately adjacent to Port of Los Angeles in San Pedro

DELIVERABLES

Goal # 1

A comprehensive "Pathways to the Port" cleanup program along public streets, alleys and parks in the neighborhoods immediately adjacent to the Port of Los Angeles in San Pedro.

Goal # 2

Involve youth and families in community betterment and environmental and marine education.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces or addresses the Port's **aesthetic, safety and health risk impact** on the communities of Wilmington and/or San Pedro by **beautifying the area of San Pedro**. The program is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **1) the improvement of the visual and aesthetic quality of specific areas in San Pedro and 2) cleanup of waste and harmful toxins**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

	Reporting Period Ends	Report Due

Summary Resiliency and disaster preparedness education for natural and man-made disasters and emergencies related to coastal and Port facilities.

Deliverables (from Work Plan)

Goal # 1

Launch Map Your Neighborhood programs. Conduct three annual Map Your Neighborhood events, to offer resiliency and disaster preparedness education for disasters and emergencies related to coastal and Port facilities, including but not limited to oil spills, shipping accidents; and coastal-related disasters, such as tsunamis.

Goal # 2

Research, design, produce and distribute 12 monthly e-newsletters to educate and motivate community stakeholders to "Be Aware and Be Prepared"

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **safety** impact on the communities of Wilmington and/or San Pedro by **conducting a "map your neighborhood" program and educating residents on safety and disaster preparedness activities**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **by providing safety training resources to residents in the event of emergencies related to disasters on the waterfront or Port facilities, such as tsunamis, oil spills, and shipping incidents**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary Youth historical and maritime education at Banning Museum

DELIVERABLES

Goal # 1

Field trips for LAUSD students from Wilmington and San Pedro, Title I schools. Acquaint students from San Pedro and Wilmington with the contributions of Phineas Banning to the growth and development of Southern California, including maritime history, and inspire achievement in their own lives.

Goal # 2

Increase student understanding of the history of Wilmington and the Banning Museum, including maritime history.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **community and cultural resources** impact on the communities of Wilmington and/or San Pedro by **providing field trips for LAUSD students to the Banning Museum**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **by providing youth with access to a cultural resource that increases knowledge about maritime and Harbor history**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

Summary Wetlands internships for youth

Deliverables (from Work Plan)

Goal # 1

Preserve the local wetlands environment and educate the public about the role of the wetlands.

Goal # 2

Educate and mentor students in scientific research through the Young Scientists Program and help youth prepare for careers, especially in science-related fields.

Goal # 3

Provide access to education, recreation and research to economically disadvantaged communities.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces or addresses the Port's **biological habitat** impact on the communities of Wilmington and/or San Pedro by **providing a biological sciences internship program** in the Harbor area. The program is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **1) opportunities for biological habitat, marine science, and wetlands education, and 2) providing San Pedro and Wilmington youth with a community resource to pursue careers and employment in wetlands research**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary A community garden that filters diesel particulate matter, absorbs carbon dioxide, improves the viewscape of the Port-facing facility, and provides sustainability and stewardship education on coastal natural resources to at-risk pre-school and school-age children.

DELIVERABLES

Goal # 1

Cultivation and maintenance of drought-resistant plants that can naturally thrive in coastal climates and improve air quality by trapping particulate matter and absorbing carbon dioxide.

Goal # 2

Related hands-on activities and educational curricula on for preschoolers and our afterschool program participants on sustainability and stewardship of coastal natural resources.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **air quality, natural resources, aesthetic** impact on the communities of Wilmington and/or San Pedro by **building a community garden in San Pedro and providing environmental education for school-age children**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment through **1) the improvement of the viewscape of a neighborhood facing the Port of Los Angeles, 2) plants and trees that improve the air quality by filtering diesel particulate matter and absorbing excess carbon dioxide, and 3) providing sustainability and stewardship education on coastal natural resources to at-risk pre-school and school-age children**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary Aquatic bird internship program

Deliverables (from Work Plan)

Goal # 1

Launch an Academic Internship Program for youth in Wilmington and San Pedro Communities focused on aquatic and marine life.

Goal # 2

Implement Animal Care Intern Data Research Program, and increase awareness of issues and impacts that affect wildlife in the SP/Wilmington communities and focus on aquatic and marine life.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces or addresses the Port's **biological habitat** impact on the communities of Wilmington and/or San Pedro by **providing a biological sciences internship program** in the Harbor area. This program is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **1) opportunities for biological habitat, marine science, and environmental education and 2) providing San Pedro and Wilmington youth with a community resource to pursue careers and employment in marine sciences**, and provides community benefits to the area affected by such Port impacts. Summary Youth training and internships in Port-related and international trade industries.

DELIVERABLES

Goal # 1

Provide summer internships to at-risk students in Wilmington and San Pedro so that students gain real-world work experience in Port-related and international trade industries.

Goal # 2

Recognize Port-related and international trade industry and intern success through Harbor community culmination.

Goal # 3

Evaluations of student performance, Port-related and international trade- industry engagement, and employer satisfaction drive program innovations that ensure HCBF's investment is fulfilled and that ITEP remains responsive to community needs.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **community resources** impact on the communities of Wilmington and San Pedro by **providing an internship program for San Pedro and Wilmington youth**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment through a **community resource for San Pedro and Wilmington youth to pursue careers and employment in maritime-related and international trade-related fields**, and provides community benefits to the area affected by such Port impacts. Summary Oil spill response education/training

DELIVERABLES

Class I (Basic Environmental Education): Launch a basic environmental educational program related to the natural and artificial environments of the Port of Los Angeles and adjacent freshwater and ocean habitats and port impacts, in the event of an oil spill, to local natural and artificial waterfront habitats of Wilmington and San Pedro. Train Wilmington and San Pedro residents as emergency responders in the event of a significant oil spill, develop volunteer network and resources for continued training (ICS, HAZWOPER, OWCN, etc.)

Class II (Technical Spill and Prevention Response): Provide volunteer and internship opportunities for Class I participants to develop field knowledge and skills to understand and monitor local aquatic and marine habitats.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **natural resources and safety** impact on the communities of Wilmington and San Pedro through an **environmental education program about freshwater and ocean habitats, the waterfront, and oil spills**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment through **a) opportunities to improve the local watershed and water quality and 2) safety training resources for residents in the event of emergencies related to Port facilities**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary Marine Mammal Care Internships and training

DELIVERABLES

Goal # 1

Establish a paid internship program for both marine animal care and education personnel, targeting LA harbor-area applicants.

Goal #2

Expand the local intern pool to provide better animal care coverage, through hands-on husbandry activities and docent duties.

Goal #3

Train interns in the Marine Mammal Care Program

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **biological habitat** impact on the communities of Wilmington and/or San Pedro by **providing a biological sciences internship program** in the Harbor area. This program is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **1) opportunities for biological habitat, marine science, and environmental education and 2) providing San Pedro and Wilmington youth with a community resource to pursue careers and employment in marine sciences**, and provides community benefits to the area affected by such Port impacts. Summary

Deliverables (from Work Plan)

Goal # 1

Provide recreation and cultural opportunities to under served and at-risk LAUSD students in San Pedro and Wilmington.

Goal # 2

Expand outreach and offer field trips on the historic USS Iowa for Wilmington and San Pedro LAUSD schools classified as Title I (students eligible for free lunch programs)

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **cultural resources** impact on the communities of Wilmington and/or San Pedro by **providing field trips for Wilmington and San Pedro students to the historic U.S.S. Iowa**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **by providing youth with access to a community resource that increases knowledge about maritime and Harbor history**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

Summary	Widespread cleanup and maintenance of landscaped areas in Wilmington

DELIVERABLES

Goal # 1

Beautify approximately 28,000 sf of parkways and setbacks along designated freight truck routes and rail lines in Wilmington, to create buffers between community and Port-related activities

Goal # 2

Eliminate runoff of pollutants into storm drains, hands-on training

Goal # 3

Job creation. The project will create two paid, part-time intern positions

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces or addresses the Port's **land use and aesthetic** impact on the communities of Wilmington and/or San Pedro by **beautifying the area of Wilmington**. This program is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **1) the improvement of the visual and aesthetic quality of Wilmington and 2) improving industrial or incompatible land uses in Wilmington**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary Protect the coastal White Point Nature Preserve, including preserving a coastal native plant garden.

DELIVERABLES

Goal # 1

Beautify and maintain the White coastal Point Nature Preserve coastal native plant garden

Goal # 2

Train at-risk adults for employment in coastal horticulture and coastal land management

Goal # 3

Launch a Docent Training Program to enhance environmental education on coastal nature preservation.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces or addresses the Port's **natural resources and aesthetic impact** on the communities of Wilmington and/or San Pedro by **beautifying, restoring and maintaining a natural habitat at White Point Nature Preserve in San Pedro**. It is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **1) restoration of natural coastal habitat and 2) improving the aesthetic and visual quality of the Harbor by planting coastal native plants**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

	Reporting Period Ends	Report Due
Six-Month Progress Report	3/31/2015	4/30/2015
Final Report	9/30/2015	10/30/2015

All reporting forms will be made available to the grantee through the Submittable online system.

HCBF Site Visits & Grantee Meetings

HCBF Staff will periodically contact grantees to conduct site visits or attend grantee meetings. The purpose of the site visit is to help HCBF better understand the nature of your project or program and offer assistance, as needed. The purpose of grantee meetings is to encourage grantees to collaborate in San Pedro and Wilmington, communicate their work, and share best practices.

Disbursement Schedule

1	2*	Total
\$25,000	\$23,000	\$48,000

*Second disbursement contingent upon receipt, review, and approval of Six-Month Progress Report

Accepted on behalf of:

Palos Verdes Peninsula Land Conservancy

Summary Aquatic-themed Tile mural on 7th Street location

DELIVERABLES

Goal # 1

To construct and install an aquatic-themed mural for the San Pedro Community, to combat blight on a block of 7th Street in San Pedro, CA.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces or addresses the Port's **aesthetic** impact on the port community of San Pedro by **beautifying an area on 7th Street with an aquatic-themed mural**. This program is a reasonable and appropriate measure to address this Port impact because it mitigates an industrial port environment through **improvement of the aesthetic and visual quality of a community resource in San Pedro**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

	Reporting Period Ends	Report Due

Summary A community garden in Wilmington that will add plants and trees that improves air quality by absorbing carbon dioxide and filtering diesel particulate matter, and provides sustainability and stewardship education on coastal natural resources.

DELIVERABLES

Goal # 1

Education of lead persons in organic gardening, including stewardship and sustainability of coastal natural resources.

Goal # 2

Construction of composting bin, install miniature drip sprinkler system, and build raised planter beds with plants and trees that improve the air quality by absorbing carbon dioxide and filtering particulate matter.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **air quality and natural resources** impact on the communities of Wilmington and/or San Pedro by **building an organic community garden in Wilmington**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **through 1) plants and trees that improve the air quality by filtering diesel particulate matter and absorbing excess carbon dioxide, and 2) providing sustainability and stewardship education on coastal natural resources**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary A public community garden on a parcel of land in Wilmington that filters diesel particulate matter, absorbs carbon dioxide, improves the viewscape of the Port-facing neighborhood, and provides sustainability and stewardship education on coastal natural resources.

DELIVERABLES

Goal # 1

Build a raised-bed community garden with plants and trees that filter diesel particulate matter, absorb carbon dioxide, and improve the viewscape of a Port-facing neighborhood.

Goal # 2

Educate at least 200 families on accessible strategies to help mitigate the negative effects of air pollution and improve air quality inside and around the home by using many different types of containers and planters.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **air quality, natural resources, and aesthetic** impact on the communities of Wilmington and/or San Pedro by **transforming an empty parcel of land in Wilmington into a community garden for the entire community**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **through 1) the improvement of the viewscape of a neighborhood facing the Port of Los Angeles, 2) plants and trees that improve the air quality by filtering diesel particulate matter and absorbing excess carbon dioxide, and 3) providing sustainability and stewardship education on coastal natural resources**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary A public community garden adjacent to a high-traffic corridor that absorbs carbon dioxide and particulate matter, improves air quality, improves the viewscape of the Port-facing neighborhood, and provides sustainability and stewardship education on coastal natural resources.

DELIVERABLES:

Goal # 1

Construct a public community garden adjacent to a high-traffic corridor (1st Street between Gaffey & Grand), bordered by the planting of Southern Magnolia, Jacaranda, and Evergreen Ash trees to improve air quality through carbon storage and sequestration.

Goal #2

Improve the view scape of the Port-facing facility (in the direct line of site of port operations) through natural leaf cover.

Goal # 3

Use the garden as a "hands on" tool to provide families with sustainability and stewardship education on coastal natural resources

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's air quality, natural resources, and aesthetic impact on the communities of Wilmington and/or San Pedro by **building a community garden in San Pedro**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **through 1) the improvement of the viewscape of a community resource facing the Port of Los Angeles, 2) plants and trees that improve the air quality by filtering diesel particulate matter and absorbing excess carbon dioxide, and 3) providing sustainability and stewardship education on coastal natural resources**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Summary Send approx. 1,500 LAUSD students from San Pedro and Wilmington to STEAM Carnival in Oct, 2014

DELIVERABLES

Goal # 1

Field trips and full admission to the October 2014 STEAM Carnival at the Port of Los Angeles, for approximately 1500 LAUSD students from San Pedro and Wilmington Title I schools.

Goal # 2

Advance STEAM identities and support job development by inspiring more harbor area students to pursue careers in science, technology, engineering, art, and math.

Providing authentically engaging STEAM activities and making real world connections.

Goal # 3

To arm educators and administrators with STEAM tools and resources that support 21st century learning

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **community resources** impact on the communities of Wilmington and/or San Pedro by **sending LAUSD students to a career exploration event in San Pedro**. It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **by providing San Pedro and Wilmington youth with access to a community resource to pursue careers and employment in Port-related careers**, and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.

Reporting Deadlines

Summary Teen and adult safety training/CERT for disasters and emergencies related to Port facilities, including oil spills, shipping accidents, and water-related disasters, such as tsunamis.

DELIVERABLES:

Goal # 1

Educate and train community members, volunteers, and high school students in community resiliency and disaster preparation for disasters and emergencies related to Port facilities, including oil spills, shipping accidents, and water-related disasters, such as tsunamis.

Goal # 2

Educate and train high school students through the teen CERT training program in the City of Wilmington for disasters and emergencies related to Port facilities, including oil spills, shipping accidents, and water-related disasters, such as tsunamis.

Goal # 3

Public community resiliency fair with interactive booths for disasters and emergencies related to Port facilities, including oil spills, shipping accidents, and water-related disasters, such as tsunamis.

MITIGATES DIRECT OR INDIRECT IMPACTS OF PORT OR PORT-RELATED OPERATIONS:

The proposed project mitigates, reduces, or addresses the Port's **safety** impact on the communities of Wilmington and/or San Pedro by **supporting a Train-the-Trainer program focused on disaster preparedness in the Harbor, and 2) providing a teen CERT (community emergency relief training) program to train teens on disaster preparedness.** It is a reasonable and appropriate measure to address this impact because it mitigates an industrial Port environment **through the provision of safety training resources to residents in the event of emergencies related to Port and Port-related facilities,** and provides community benefits to the area affected by such Port impacts. This program conforms to the requirements of the TraPac MOU.
