---

Here is my comment that was left on social media as so many are being affected by the powers.

The Natural Resources Defense Council mission is to replace middle class jobs with robots because they believe it's more environmentally correct. They know that as ai gets cheaper and the base cost of low or no emissions equipment grows the difference in cost to add ai becomes a smaller % of the new equipment and when you included removing the cost paid to the employee ai looks more & more appealing. NRDC threw litigation can raise a whole host of fix cost, therefore the labor becomes the sacrificial lamb. And the city of LA is in bed with them. It's not big business people should be scared of, it's big government controlled by lawyers.

John Marinkovich  
3rd generation San Pedro.

PS It is interested how lawyers from Santa Monica seem to know how to take care of me. And just who are these so called people they are representing?
