

San Pedro Bay Ports Clean Air Action Plan

News Release

2010 Clean Air Action Plan Update Released San Pedro Bay ports renew commitment to air-quality improvement

September 21, 2010

The ports of Los Angeles and Long Beach today released the 2010 San Pedro Bay Ports Clean Air Action Plan (CAAP) Update, which sets even more aggressive goals and strategies for reducing air pollution and health risks from goods movement.

The draft 2010 CAAP Update was released in April. This final version of the 2010 CAAP Update incorporates comments and changes and is scheduled to be considered for approval in a joint meeting of the two ports' boards of harbor commissioners on October 6, at 2 p.m. at Banning's Landing Community Center, 100 E. Water St., Wilmington 90744. The meeting will be webcast live at www.polb.com/webcast and on the Port of Los Angeles website [here](#).

The 2010 CAAP Update, Fact Sheet and "Response to Comments" document are available at www.cleanairactionplan.org, www.polb.com/caap or www.portoflosangeles.org.

The original CAAP and the 2010 CAAP Update were developed with significant input and collaboration among the ports, the U.S. Environmental Protection Agency, California Air Resources Board and South Coast Air Quality Management District.

The Port of Los Angeles and the Port of Long Beach are the two busiest U.S. seaports, moving \$300 billion in trade each year and supporting more than 500,000 jobs in Southern California.
