**Chapter 2**  
Project Description ........................................................................................................ 2-1

1. **2.1**  
Introduction ................................................................................................................. 2-5

2. **2.2**  
Background and Project Overview ............................................................................ 2-5

2.2.1 Port Planning ....................................................................................................... 2-5

2.2.2 Project Overview ................................................................................................. 2-7

2.3 **NEPA Purpose and Need** .................................................................................. 2-7

2.3.1 Project Purpose ................................................................................................... 2-7

2.3.2 Project Need .......................................................................................................... 2-8

2.4 **CEQA Project Objectives** ................................................................................ 2-8

2.5 **Project Location and Setting** ........................................................................ 2-9

2.5.1 Regional Setting .................................................................................................. 2-9

2.5.2 Local Setting ......................................................................................................... 2-9

2.5.3 Project Site and Surrounding Uses .................................................................... 2-9

2.5.4 Existing Terminal Facilities, Operations, and Project Site ......................... 2-11

2.5.5 Historical Use of the Proposed Project Site .................................................. 2-26

2.6 **Proposed Project Development** ...................................................................... 2-27

2.6.1 Proposed Project Elements ................................................................................ 2-27

2.6.2 Proposed Project Operations ............................................................................. 2-38

2.7 **Analysis Baselines** ........................................................................................ 2-40

2.7.1 CEQA Baseline .................................................................................................... 2-40

2.7.2 NEPA Baseline .................................................................................................... 2-41

2.8 **Federal Scope of Analysis** ................................................................................ 2-42

2.9 **Alternatives** ...................................................................................................... 2-44
Contents

2.9.1 Alternatives Evaluated in this Draft EIS/EIR ................................................... 2-44
2.9.2 Alternatives Considered but not Further Evaluated ........................................ 2-53
2.10 Relationship to Existing Statutes, Plans, Policies, and Other Regulatory Requirements ................................................... 2-57

Chapter 3 Environmental Analysis ........................................................................ 3-1
3.1 Introduction ...................................................................................................... 3-1
3.2 Terminology Used in This Environmental Analysis ........................................... 3-2
3.3 Requirements to Evaluate Alternatives ............................................................ 3-3

Section 3.1 Aesthetics and Visual Resources ............................................................ 3.1-1
3.1.1 Introduction ................................................................................................... 3.1-3
3.1.2 Environmental Setting ................................................................................... 3.1-4
3.1.3 Applicable Regulations ............................................................................... 3.1-14
3.1.4 Impacts and Mitigation Measures ................................................................ 3.1-14
3.1.2 Significant Unavoidable Impacts ................................................................. 3.1-49
