

**THE PORT
OF LOS ANGELES**

Executive Director's
Report to the
Board of Harbor Commissioners

DATE: NOVEMBER 16, 2021

FROM: INFORMATION TECHNOLOGY

**SUBJECT: RESOLUTION NO. _____ - APPROVAL TO SIGN
AUTHORIZATIONS TO ORDER FOR TELECOMMUNICATION UTILITY
SERVICES UNDER STATE OF CALIFORNIA CALNET NEXT
GENERATION CONTRACTS WITH AT&T**

SUMMARY:

Staff is requesting approval to sign three State of California (State), California Network Next Generation (CALNET Next Gen) Authorizations to Order (ATOs) with AT&T Corporation (AT&T). The proposed ATOs would allow the City of Los Angeles Harbor Department (Harbor Department) to order telecommunications products and services at the reduced rates negotiated by the State with AT&T.

The not-to-exceed payment amount for the proposed ATOs shall be the amount approved by the Board of Harbor Commissioners (Board) for the Telephone Services budget account during each annual budget process. The duration of the proposed ATOs will be three years, from January 1, 2022 through December 31, 2024. AT&T was awarded participation in the CALNET Next Gen contract after a competitive procurement process conducted by the State of California's Department of Technology.

Expenditures incurred under the proposed ATOs are the financial responsibility of the Harbor Department.

RECOMMENDATION:

It is recommended that the Board of Harbor Commissioners:

1. Find that the Director of Environmental Management has determined that the proposed action is administratively exempt from the requirements of the California Environmental Quality Act (CEQA) under Article II Section 2(f) of the Los Angeles City CEQA Guidelines;
2. Find that in accordance with Administrative Code Section 10.15(8), the competitive contracting requirement is met using the responses from the State of California's Invitation For Bids solicitation, which resulted in the State of California's Office of Technology Services CALNET Next Gen Statewide Contracts C4-DNCS-19-001-40, C4-LEG-12-10-TS-01 and C4-CVD-19-001-04;

DATE: NOVEMBER 16, 2021

SUBJECT: APPROVAL TO SIGN AUTHORIZATIONS TO ORDER FOR CALNET NEXT GENERATION TELECOMMUNICATION UTILITY SERVICES WITH AT&T

3. Approve the three CALNET Next Gen Authorizations to Order with AT&T for the acquisition of telecommunications products and services for three years from January 1, 2022 through December 31, 2024;
4. Authorize the Chief Information Officer for the Harbor Department, or designee, to be the Harbor Department's authorized signatory for ordering services through CALNET Next Gen; and
5. Adopt Resolution No. _____.

DISCUSSION:

Background/Context – The Information Technology Division (ITD) provides the computing and telecommunications services for the Harbor Department. This includes managing the telecommunications services that are required for the Harbor Department's voice and data networks.

The Harbor Department has been using the CALNET series of contracts since 1999. The CALNET series was created by the State of California to combine the buying power of the state and local public agencies to incentivize telecommunications providers to offer their most competitive rates. By participating in CALNET, the Harbor Department can acquire necessary telecommunications services quickly and cost effectively. Without CALNET, the Harbor Department would be charged higher tariff rates for the same services. Other City of Los Angeles Departments also use CALNET, including the Information Technology Agency, Los Angeles World Airports, and the Department of Water and Power.

Currently, the Harbor Department is using CALNET 3 to provide local and long distance telephone services, high-bandwidth data circuits, radio circuits, metro-ethernet services, and voice over internet protocol (VoIP) supporting circuits. CALNET 3 expires on December 31, 2021. In addition to paying for telephone bills, these services are used to connect the Harbor Department's network to the City of Los Angeles' networks, extend Port Police and Port Pilot radio network coverage, connect remote offices to the data network, monitor Alternative Maritime Power (AMP) terminals, link systems throughout the Port of Los Angeles complex (e.g. security systems, building operations, elevators, fire and life safety systems), and for radars and cameras to monitor ship traffic throughout the port complex.

SUBJECT: APPROVAL TO SIGN AUTHORIZATIONS TO ORDER FOR CALNET NEXT GENERATION TELECOMMUNICATION UTILITY SERVICES WITH AT&T

For Fiscal Year 2020/2021, the Harbor Department spent \$738,748 for CALNET telecommunication services. The estimated amount for CALNET services in Fiscal Year 2021/2022 is \$756,000.

Proposed CALNET Next Gen ATOs – The three proposed CALNET Next Gen ATOs (Transmittals 1, 2 and 3) allow the Harbor Department to order the following telecommunications products and services at the reduced rates negotiated by the State with AT&T.

- Category 15, Dedicated Transport
- Category 15.2.2, Carrier Digital Service Offerings (DSO) Service
- Category 16, Long Distance Calling
- Category 17, Toll Free Voice Calling
- Category 18, Long Distance Calling
- Category 18.3.1.1, Analog Service
- Category/Subcategory 19.1, CALNET Cellular Business Services
- Category 20, Multiprotocol Label Switching (MPLS) Data Network Services
- Category 21, Standalone Voice over Internet Protocol (VoIP) Services
- Category 22, Cloud Hosted VoIP Services
- Category 23, Metropolitan Area Network (MAN) Ethernet Services and Features
- Category 24, Flat Rate Internet Services
- Category 25, Sustained Bandwidth Internet Services and Features
- Category 29, Converged VoIP Services
- Category 30, Broadband with Internet Services

The not-to-exceed payment amount for the proposed ATOs shall be the amount approved by the Board for the Telephone Services budget account during each annual budget process. The duration of the proposed ATOs will be three years, from January 1, 2022 through December 31, 2024.

The ATOs are non-binding. CALNET Next Gen does not have an exclusivity clause or stipulation requiring any long-term commitments from the Harbor Department. The Harbor Department will be able to consider alternate providers if any provider offers a more advantageous solution. If the Harbor Department decides that the services under CALNET Next Gen are not meeting expectations, or if an alternative solution is required, AT&T cannot demand that the Harbor Department pay early termination fees or penalties. The only requirement to cancel services is a 30-day written notice from the Harbor Department to AT&T.

SUBJECT: APPROVAL TO SIGN AUTHORIZATIONS TO ORDER FOR CALNET NEXT GENERATION TELECOMMUNICATION UTILITY SERVICES WITH AT&T

Selection Process – AT&T was awarded participation in the CALNET Next Gen contract after a competitive procurement process conducted by the State of California. The State's Department of Technology, Statewide Technology Procurement Division released Invitation for Bids solicitations for multiple categories which was used to establish a list of Prequalified Multiple Award Contract (PMAC) contractors. Contract C4-LEG-12-10-TS-01 was awarded for Categories 15-18 on January 3, 2019. Contract C4-CVD-19-001-04 for Category 19 was awarded on May 23, 2019. Contract C4-DNCS-19-001-40 for Categories 20-30 was awarded on multiple dates through multiple amendments in 2020 and 2021.

ENVIRONMENTAL ASSESSMENT:

The proposed action is approval of three CALNET Next Gen ATOs with AT&T to allow the Harbor Department to continue receiving discounted rates for existing telecommunications products and services, which is an administrative activity. Therefore, the Director of Environmental Management has determined that the proposed action is administratively exempt from the requirements of CEQA in accordance with Article II Section 2(f) of the Los Angeles City CEQA Guidelines.

FINANCIAL IMPACT:

This request to authorize the Harbor Department to sign the three ATOs with AT&T is not a request for funding. Signing these ATOs will allow the Harbor Department to continue receiving discounted rates for existing telecommunications products and services, and allow the Harbor Department to acquire necessary telecommunications products and services in a cost effective and timely manner.

Fiscal Year 2021/2022 funds in the amount of \$1,479,500 were budgeted in Account 59410 (Telephone Services), Center 0640, Program 000. Of this amount, \$580,000 is estimated for local telephone services to pay for telephone bills, which is the primary expenditure under CALNET. Funds in the estimated amount of \$176,000 in Account 59410, Center 0640, Program 000 account, may be used to pay for related items provided under CALNET, including cabling and wiring, data circuits, internet services, mobile communication services, telephone system maintenance and other telephone services. However, the total amount of the proposed ATOs will not exceed the approved amount for Account 59410, Center 0640, Program 000. Future Fiscal Year funds will be requested as part of the annual budgeting process, subject to Board approval.
